

Inspecta

Inspecta has acquired Applus RTD's local company in Denmark

On Monday, 31st of August 2015, Inspecta and Applus closed a deal where Applus RTD's local company in Denmark, Applus RTD Denmark A/S, is transferred to Inspecta. The deal is effective from day one and the local company will continue to be run as an own legal entity with the current management team. Operations will continue to be based in Esbjerg, with more than 30 field inspection experts and supporting staff.

"We have been seeking for a move that would improve our capabilities to serve our customers in the Danish market. In particular, we are looking forward to developing our operations with the new industrial knowledge and highly qualified NDT services that have now become part of Inspecta. We want to increase our market share and support our customers also in demanding projects", says Kari Aulasmaa, CEO of Inspecta.

The new company will start under the name Inspecta Project Services A/S. Managing director Otto Ravn welcomes the new business opportunities: "We are very happy with the open discussions with Inspecta. We look forward to becoming part of Inspecta family and to all the co-operation opportunities with our new colleagues here in Denmark and also in other countries."
